DO YOU HEAR, BUT NOT ALWAYS UNDERSTAND?

TAKE THE 10-DAY CHALLENGE!

Acute Hearing is looking for **people who have difficulty hearing**, especially in noisy environments, to participate in **THE 10-DAY CHALLENGE** and evaluate the most natural-sounding hearing device ever made!

We are offering **Hearing Screenings and Ear Canal Exams at NO CHARGE** to all who believe they may suffer from hearing loss. If eligible, you will evaluate this revolutionary hearing technology for 10 days in your regular routine. Hear the difference for yourself!

**50% down due at signing. Participants will wear hearing aids for 10 days, and if not satisfied, may return and receive full refund. If not returned within 10 days, a cancellation fee may apply.*

CALL NOW TO TAKE PART IN THE 10-DAY CHALLENGE!

As part of this special offer, you will receive:

- **FREE** Hearing Screening
- **FREE** Ear Canal Exam
- **FREE** Hearing Consultation
- **FREE** Demonstration

It's here!

Now you can screen
for colon cancer with
just a  blood test.

Ask your doctor about **Shield**,
the more pleasant way to screen.

Shield is Medicare covered.

Visit www.shieldcancerscreen.com to learn more

Important Product Information

Intended Use

The Shield[®] test is a qualitative, in vitro diagnostic test intended to detect colorectal cancer derived alterations in cell-free DNA from blood collected in the Guardant Shield Blood Collection Kit.

Shield is indicated for colorectal cancer screening in individuals at average risk for the disease, age 45 years or older. Patients with a positive result should be followed by colonoscopy. Shield is not a replacement for diagnostic colonoscopy or for surveillance colonoscopy in high-risk individuals. This test is performed at Guardant Health, Inc.

Precautions: Based on data from clinical studies, Shield has limited detection (55%-65%) of Stage I colorectal cancer and does not detect 87% of precancerous lesions. One out of 10 patients with a negative Shield result may have a precancer that would have been detected by a screening colonoscopy. Shield demonstrated high detection of Stage II, III, and IV colorectal cancer.

Limitations and Other Important Information: The Shield test is not indicated for patients that have personal history of colorectal cancer, adenomas, or other related cancers; or those who had a positive result on another colorectal cancer screening method within the last six months, have been diagnosed with a condition associated with high risk for colorectal cancer such as Inflammatory Bowel Disease (IBD), chronic ulcerative colitis (CUC), Crohn's disease; or who have a family history of colorectal cancer, or certain hereditary syndromes. Providers should discuss the most appropriate screening test to use with patients depending on their medical history and individual circumstances. Shield may produce a false negative or false positive result. A false negative result may occur when the Shield test does not detect a colorectal tumor signal while a colonoscopy identifies a colorectal cancer. A negative result does not guarantee the absence of colorectal cancer or advanced adenoma, and patients should continue participating in colorectal cancer screening programs at the appropriate guideline-recommended intervals. A false positive result may occur when the Shield test generates a positive result while a colonoscopy will not find colorectal cancer or advanced adenoma.

Please visit ShieldCancerScreen.com for complete product information about the Shield test including full safety information. © 2024 Guardant Health, Inc. All rights reserved. MKT-0004811/24

LICENSED AND INSURED

Protect Yourself from Fraud

Fraudsters are constantly finding new ways to trick people out of their hard-earned money. By staying informed and vigilant, you can significantly reduce your risk of becoming a victim. Below are highlights of some common scams and tips to protect yourself.

Romance Scams: Don't let your heart be stolen

How it works: Scammers create fake online profiles, often on dating sites or social media, to build emotional relationships with their targets. Once trust is established, they'll ask for money for various fabricated emergencies or travel expenses.

Red flags:

- » Professes strong feelings quickly, without meeting in person.
- » Claims to be overseas or unable to meet due to ongoing issues.
- » Asks for money for urgent situations, medical bills, or travel.
- » Avoids video calls or meeting in person.

Protect yourself:

- » Be cautious of anyone you haven't met in person who declares their love for you.
- » Never send money to someone you've only met online.
- » Do your research: look for inconsistencies in their story or profile pictures.
- » Talk to trusted friends or family members about the relationship.

Investment Fraud: Promises too good to be true?

How it works: Scammers lure investors with promises of high returns and low risk, often using unregistered investments or Ponzi schemes. They may pressure you to invest quickly before the "opportunity" disappears.

Red flags:

- » High-pressure sales tactics and promises of guaranteed returns.
- » Unsolicited investment offers.
- » Complex or secretive investment strategies.
- » Lack of proper registration or licensing.

Protect yourself:

- » Be skeptical of unsolicited investment offers.
- » Research the investment and the salesperson thoroughly.
- » Never invest based on pressure or emotional appeals.
- » If it sounds too good to be true, it probably is.

General Tips to Stay Safe

- » Never give out personal information (Social Security number, bank account details, credit card numbers) to unsolicited callers, emails, or messages.
- » Be wary of urgent requests for money. Legitimate organizations will not pressure you to act immediately.
- » Don't click on suspicious links or open attachments from unknown senders.
- » Verify information independently, call the organization directly using a known phone number.
- » Talk to someone you trust if you're unsure about a situation.
